PHOTOGRAPHY

The Process

At The Studio:

Once you arrive at the studio, there is a place to change and freshen up. Feel free to bring anything you would like to drink or nibble on.

During the photo session, you have an opportunity to do several changes of clothing with varying posing and backgrounds. It is a collaborative effort and your ideas and suggestions will happily be incorporated into the shoot. **The session takes about 45 min to an hour.**

Your Online Proofs:

Once the session is complete, your proofs will be put online for you to review. This usually takes only a few days.

There will be an email from customerservice@collages.net letting you know your proofs are ready for viewing and providing you a link to the website. **The user name will be your name and the password will be 17574. This will be emailed to you by customerservice@collages.net.**

Reviewing Your Proofs:

Once you choose the ones you like the best, you can put them into a favorites folder on the site. I can help you if you get stuck at any point or want some help narrowing them down. I tend to give you lots of images to choose from, so take your time. You can send the link to anyone you want to view the proofs as well. *All they need is name of the event and the password (which you will have). No one can view your favorites folder but you unless they sign on using the email address you used to sign on.

Keep in mind that **these are low resolution images and your final images will be much better. Look for pose and expression. Basic retouching is included in your package and on individually purchased photos.**

Ordering your images:

After you have chosen the ones you want, let me know by providing me with the number on the photos. **All orders must come through me**, not placed through the website. I will go over what you want and what I can do to enhance the final images. Basic retouching of superficial facial lines, obvious stray hairs, color and contrast is included with your package. All other retouching such as changing backgrounds, slimming or changing the shape of body parts, extra facial line removal, and so on is extra.

Once I am done working on the final photos, I will email them to you.

If they look good, keep these images as your final digital files. If there is tweaking that needs to be done just let me know and I will make every effort to get to it as quickly as possible. Two "tweakings" are part of the package, more than that gets into extra cost.

Even though I retain the copyright, for business photos, the rights agreement gives you the ability to use them as you want. All I ask is to please provide photo credit whenever possible. **That's all there is to it. You will have some wonderful photos to enjoy for years to come.**
